■ Gemini Enterprise: Presenter's Stage Playbook & Run of Show

Google Store Consumer Hardware Launch Operations | Project: your-gcp-project-id

Step 0: Pre-Flight Browser Tab Setup (Stage Checklist)

Arrange these 5 tabs in a single browser window signed in as **your-email@your-domain.com** before presenting:

Tab #	Application / Document	Stage Role & Clickable Link
Tab 1	Gemini Enterprise Chat	**Main Stage:** Run all 8 prompts & click A2UI cards (Open Chat)
Tab 2	BigQuery Studio (hub_inventory)	**Proof 1:** Schema formulas & Preview values (Open BigQuery)
Tab 3	Supplier Quality 2-Page PDF	**Proof 2:** Page 2 Section 4 Table: Lot DISP-P11-904 (Open 2-Page PDF)
Tab 4	Carrier Discrepancy 85-Row Excel	**Proof 3:** 85 rows with 12 DHL holds at Brussels (Open 85-Row Excel)
Tab 5	Real-Time Operations Console	**Proof 4:** Live task queue transition (Open Operations Viewer)

Executive Primer: De-Jargoning Key Terms

What is an RMA? Return Merchandise Authorization = official **customer warranty return ticket**. When a customer returns a broken device, an RMA tracks diagnostic inspection and replacement dispatch. *Universal translations:* Banking (disputed fraud claim); Healthcare (equipment recall / adverse event); Insurance (accident claim / FNOL); IT/SaaS (P1 production outage ticket).

Step 1: Foundation & Data Overview (Tab 1)

Prompt to Copy-Paste:

```
Hello! As the Google Store Operations Manager, can you give me an executive operational overview of our European launch status for the Pixel 11, Pixel 11 Pro, and Pixel Watch 5 lineup? Show me the active distribution hubs, total on-hand stock vs preorder reservations, and highlight any inventory bottlenecks across our European logistics network.
```

■ **Stage Directions & Click Flow:** Start on Tab 1. Watch Gemini render the hub_inventory table. DO NOT click buttons yet. Point to Row 1: Tilburg has 1,250 stock vs 1,680 preorders (deficit of 430 units, CRITICAL_BACKORDER).

■■ **What You Say:** Say to Audience: 'Notice I didn't write SQL or wait two weeks for a BI dashboard. I just asked in plain English. Gemini Enterprise queries our live database and gives me an instant operational snapshot.'

■ **Universal Industry Translation:** Universal Translation: Banking: 'Show me today's mortgage approvals vs pending verifications across all branches.'

Step 2: Knowledge Catalog Metadata Discovery (Tab 1 -> Tab 2 Schema & Preview -> Tab 1)

Prompt to Copy-Paste:

```
Before we take action on inventory levels, can you check the Knowledge Catalog metadata for the hub_inventory table? Specifically explain the business definitions and calculation rules for `safety_threshold` and `stock_status`, and confirm which status values trigger an automated replenishment alert under Google Store fulfillment standards.
```

■ **Stage Directions & Click Flow:** CUE: Switch to Tab 2 (BigQuery Studio). (1) In Schema tab, show safety_threshold formula: '(Daily Demand x Lead Days) + Margin' & stock_status alert trigger ('CRITICAL_BACKORDER if on_hand - reserved < 0'). (2) Click Preview tab: point to Tilburg (1250 on-hand, 1680 reserved -> -430 deficit < 0 -> CRITICAL_BACKORDER). Switch back to Tab 1.

■■ **What You Say:** Say to Audience: 'Every enterprise has its own business rules. Generic AI guesses; Gemini Enterprise consults corporate schema descriptions in BigQuery, understanding exact formulas and why Tilburg is in backorder before taking action.'

■ **Universal Industry Translation:** Universal Translation: Financial Compliance: Explaining corporate definitions of 'Affluent Client' or 'High Risk AML'.

Step 3: Cross-Source Discovery [THE WOW MOMENT] (Tab 1 -> Tab 3 Page 2 -> Tab 1)

Prompt to Copy-Paste:

```
We're seeing a spike in customer RMA warranty returns for screen flicker on the Pixel 11 Pro 256GB Obsidian in Europe. Can you cross-reference our internal `rma_defect_records` table with the external factory quality audit report (google-store_audit_report.pdf) from our Asian assembly plant? Identify which component sub-lot is causing the failure, quantify the discrepancy between factory gate testing and European service center intake, and identify affected customer orders.
```

■ **Stage Directions & Click Flow:** CUE: Switch to Tab 3 (PDF). Point to Page 2, Section 4 Table: Lot DISP-P11-904 in red showing 9.6% vs 1.2%. Mention this is a raw PDF on Drive, NOT in the database. Switch back to Tab 1: Show Gemini matching lot DISP-P11-904 to customer order IDs in BigQuery!

■■ **What You Say:** Say to Audience: 'In most companies, connecting an external vendor PDF to customer complaint tickets takes three meetings and two weeks of manual spreadsheets. Gemini did it in 5 seconds.'

■ **Universal Industry Translation:** Universal Translation: Healthcare/Pharma: Matching a medical device manufacturer recall PDF with internal surgical logs.

Step 4: Multi-Step Immediate Workflow [ACTION & HITL] (Tab 1 [Click] -> Tab 5 -> Tab 1)

Prompt to Copy-Paste:

```
Our Tilburg Central DC (NL-TILBURG-01) is facing a critical 430-unit deficit for the Pixel 11 Pro 256GB Obsidian, putting European preorder delivery SLAs at severe risk. Scan the rest of our European logistics network for available buffer stock, propose an immediate inter-hub stock rebalancing transfer, and prepare the authorization request.
```

■ **Stage Directions & Click Flow:** CLICK ACTION: Click the blue [Approve Stock Transfer] button on the A2UI Card! Then CUE: Switch to Tab 5 (Operations Console): Point to task-launch-backorder-01 turning COMPLETED live! Switch back to Tab 1.

■■ **What You Say:** Say to Audience: 'Insight without action is useless. Gemini builds an approval button. When I click Approve, it writes directly to our production systems. The human stays in control, but manual friction is gone.'

■ **Universal Industry Translation:** Universal Translation: Insurance: Generating a one-click claim settlement payout approval card.

Step 5: Large-Scope Batch Execution [CLOUD SANDBOX] (Tab 1 [Click] -> Tab 4 -> Tab 1)

Prompt to Copy-Paste:

```
DHL Express and DPD Europe reported multiple transit exceptions across our preorder consignments. I need you to perform a full reconciliation of all delayed customer orders against the 85-row carrier discrepancy ledger (google-store_external_ledger.xlsx), resolve customs documentation holds at Brussels Air Hub, and calculate our contractual SLA clawback penalties across all delayed shipments.
```

■ **Stage Directions & Click Flow:** CLICK ACTION: On Execution Mode Dialog, click [Run in Background (Sandbox)]! CUE: Switch to Tab 4 (Excel Ledger): Show 85 tracking rows, with Rows 7-18 showing DHL CUSTOMS_HOLD (UN3481). Switch back to Tab 1: Show €12,450 clawback calculated in background.

■■ **What You Say:** Say to Audience: 'Generic chatbots crash on massive spreadsheets. Gemini Enterprise delegates heavy lifting to a secure Cloud Sandbox, running Python code in the background while keeping your chat responsive.'

■ **Universal Industry Translation:** Universal Translation: Finance: Auditing 50,000 monthly employee expense receipts against tax compliance policies.

Step 6: Scheduled Automated Monitoring [PROACTIVE AI] (Tab 1 -> Tab 5 -> Tab 1)

Prompt to Copy-Paste:

```
Set up an automated daily monitoring check every morning at 08:00 UTC. The agent must inspect inventory levels across all European hubs, check for any newly created CRITICAL severity RMA records (such as Pixel Watch 5 ceramic seal ingress), and register an escalation task in Firestore if safety thresholds are breached.
```

■ **Stage Directions & Click Flow:** CUE: Switch to Tab 5 (Operations Console): Show the active Pub/Sub cron registration (0 8 * * *). Switch back to Tab 1.

■■ **What You Say:** Say to Audience: 'Most AI is purely reactive. Here, we register a proactive autonomous rule. Every morning at 8 AM, the agent audits inventory and defect logs, alerting the team only if a threshold is breached.'

■ **Universal Industry Translation:** Universal Translation: Banking Fraud: Automated nightly sweeps of high-velocity wire transactions above threshold.

Step 7: Strategic Automation & Quantified Outcomes [EXECUTIVE ROI] (Tab 1)

Prompt to Copy-Paste:

```
Provide an executive summary of the entire Pixel 11 and Watch 5 launch triage operation. Synthesize our actions across Fulfillment, Quality Assurance, and Logistics: summarize the units rebalanced, customs holds resolved, defective display lots quarantined, and goodwill credits issued. Quantify the final impact on customer on-time delivery rates and preorder lead time reduction.
```

■ **Stage Directions & Click Flow:** DO NOT CLICK. Point to the 3 ROI numbers on screen: (1) Lead time reduced 7.2 to 1.8 days (75% faster); (2) 98.4% preorder SLA preserved; (3) €48,200 in delayed inventory unlocked from customs.

■■ **What You Say:** Say to Audience: 'When leadership asks What was the ROI of this AI investment?, Gemini synthesizes results across Logistics, Quality, and Finance, proving tangible business impact with an unalterable audit trail.'

■ **Universal Industry Translation:** Universal Translation: Board-ready executive summaries showing hours saved, revenue protected, and compliance logs.

Step 8: Autonomous Slide Deck Generation (.pptx) [GRAND FINALE] (Tab 1)

Prompt to Copy-Paste:

```
Can you generate an executive slide deck summarizing our Pixel 11 and Watch 5 launch recovery, showing the inventory rebalancing and SLA preservation metrics? Build the presentation and provide the download link.
```

■ **Stage Directions & Click Flow:** Stay on Tab 1. Watch Gemini invoke the Cloud Sandbox (delegate_autonomous_task) to build an authentic 16:9 widescreen .pptx presentation. Click the delivered download link in chat to download the deck!

■■ **What You Say:** Say to Audience: 'Notice I don't copy-paste numbers from chat into PowerPoint. Gemini's cloud sandbox writes and runs Python code in the background, generates a complete 16:9 board-level deck with charts and speaker notes, and gives me the download link directly in the conversation.'

■ **Universal Industry Translation:** Universal Translation: Consulting & Strategy: Instantly converting complex multi-source operational analysis into client presentation decks.
